## Main points

### Impact of the bushfires on the March quarter 2020 estimates

The March quarter 2020 Small Area Labour Markets (SALM) estimates will reflect the impact of the 2019-20 bushfires. Unfortunately, it is not possible to definitively quantify the specific impact of the bushfires or the support arrangements made to people in fire affected areas (such as the suspension of Mutual Obligation requirements) on the unemployment estimates.

Accordingly, users should exercise care when interpreting the March quarter 2020 figures for bushfire-affected regions.

### Change in Unemployment Benefit payments

On 20 March 2020, Newstart Allowance was discontinued and was replaced by the JobSeeker payment. While there are some minor changes to the population covered by JobSeeker, compared with Newstart, analysis undertaken by the National Skills Commission indicates that this has not had a material impact on the viability of using this payment as part of the methodological process used to produce the unemployment and unemployment rate estimates in SALM.

### Impact of COVID-19 on the March quarter 2020 estimates

The COVID-19 pandemic began to have a significant impact on the Australian labour market from mid-March, when non-essential services were shut down and trading restrictions were implemented. The reference week for the March 2020 ABS *Labour Force Survey*, however, was in the first two weeks of March. Accordingly, COVID-19 did not have a significant impact on either the smoothed or unsmoothed SALM estimates for the March quarter 2020.

### Changes to the geographic structure

As of the June quarter 2019 edition of SALM, the Statistical Area Level 2 (SA2) estimates are now based on the Australian Bureau of Statistics (ABS) *2016 Australian Statistical Geography Standard (ASGS)*. The geographical structure used in SALM is now aligned with the most recent ABS *Census of Population and Housing*.

Due to changes in the ASGS between the 2011 and 2016 editions, there were a number of breaks in series at the SA2 level. These were due, largely, to SA2s being split into multiple, smaller SA2s but there was also a small number of amalgamations and other breaks. For more information, please see the *SALM 2016 Changeover User Guide*, available on the [SALM website](#).

## Smoothed estimates not available for all SA2s and LGAs

Due to the breaks in series noted above, and because the production of smoothed estimates requires four consecutive quarters of unsmoothed data, smoothed estimates for SA2s or Local Government Areas (LGAs) that experienced a break in the unsmoothed series between the March and June quarters 2019 are only available starting from the March quarter 2020. For the June quarter 2019 to the December quarter 2019, the only available estimates are from the unsmoothed series, available on the [Explanatory Notes](#) page of the SALM website. As is always the case for unsmoothed data, significant caution should be exercised when examining these figures, as they exhibit far greater volatility than the smoothed series.

## Introduction

SALM presents regional estimates of unemployment and the unemployment rate at two small area levels:

- For approximately 2,200 ABS SA2s, on a State/Territory and Metropolitan/Non-metropolitan basis, provided in Table 1. For the States and the Northern Territory, estimates for the Capital City and the Rest of State are also provided; and
- For approximately 540 Australian LGAs, provided in Table 2.

The estimates in Tables 1 and 2 are smoothed using a four-quarter average to minimise the variability inherent in small area estimates. A description of the methodology used to prepare the estimates in this publication is presented on page 45.

**Caution:** Highly disaggregated estimates of unemployment and the unemployment rate at the SA2 and LGA level can display significant variability and should be viewed with caution, particularly in regions where the SA4 level unemployment data that underpin the SALM estimates have been exhibiting considerable volatility. As a result, quarter-to-quarter comparisons may not be indicative of actual movements in the labour market. It is therefore

recommended that year-on-year comparisons be used and that large movements in the SA2 and LGA data be viewed with caution.

Further, where large movements in the SA2 and LGA estimates are encountered, or in SA2s and LGAs with a small labour force, users are advised to examine Census labour force data in addition to the SALM estimates.

## Labour market developments at the small area level

The March quarter 2020 SALM estimates show that 47.9 per cent of SA2s recorded a decrease in their unemployment rate over the year to the March quarter 2020.

In the March quarter 2020, 58.8 per cent of SA2s recorded an unemployment rate of less than 5.0 per cent while 10.4 per cent of SA2s recorded an unemployment rate of 10.0 per cent or more.

## Next issue

It is anticipated that the June quarter 2020 issue of SALM will be released in late September 2020.

## Contact details

This report was prepared by the Labour Market Analysis and Advice Section within the Labour Market Research and Analysis Branch. For further information, please contact Joel Meehan on (02) 6240 5358 or Andrew Gatenby on (02) 6240 9130, or email the SALM inbox at [SALM@skillscommission.gov.au](mailto:SALM@skillscommission.gov.au).

Source: Data for Australia, the States, Territories and the Greater Capital City Statistical Areas are from ABS, *Labour Force, Australia, Detailed - Electronic Delivery* (Cat. no. 6291.0.55.001). Data are 12-month averages of *original* estimates so as to be comparable with SALM data.

\* Due to the small size of the labour force, particular care should be exercised when interpreting these estimates.

Source: Data for Australia, the States and Territories are from ABS, *Labour Force, Australia, Detailed - Electronic Delivery* (Cat. no. 6291.0.55.001). Data are 12-month averages of *original* estimates so as to be comparable with the SALM data.

\* Due to the small size of the labour force, particular care should be exercised when interpreting these estimates.

\*\* The ACT is not divided into separate LGAs. The total for the Territory has been included for comparative purposes.

† The ABS notes that the quality of the correspondence used to produce this LGA is poor. Accordingly, please use these figures with caution, as concordance error may limit how much they reflect actual labour market conditions in the LGA.

## Explanatory notes

### Structure of regional estimates in Tables 1 and 2

State/Territory data by Statistical Area Level 2 (SA2) and Local Government Area (LGA) are presented in Tables 1 and 2, respectively. For the States and the Northern Territory, estimates for the Capital City and the Rest of State area are also presented in Table 1.

There are around 2,200 SA2s and 540 LGAs in Australia. The SA2s are a geographical unit that comprise the Statistical Area Level 4s in the Australian Bureau of Statistics' (ABS) 2016 Australian Statistical Geography Standard (ASGS), upon which the ABS Labour Force Survey data are based. The SA2 estimates are then concorded to the LGA level in Table 2 using population weights based on the latest available SA2 to LGA correspondence from the ABS.

### Methodology

The estimates in Tables 1 and 2 are based on the Structure Preserving Estimation (SPREE) methodology, which enables the generation of small area unemployment, unemployment rate and labour force estimates. Given the level of disaggregation involved, the data are smoothed (ie, averaged) over four quarters to dampen the variability inherent in the small area estimates.

The estimates presented in Table 1 and 2 are derived from three primary data sources:

1. Current recipients of Youth Allowance (other), and current recipients of Newstart Allowance/JobSeeker Payment who are not on a zero rate of payment, by SA2;
2. ABS Labour Force Survey data by ABS Statistical Area Level 4 (SA4). The ABS Labour Force Survey samples private and non-private dwellings (approximately 26,000 households) across Australia and covers about 0.32 per cent of the population. More details about the methodology underpinning this survey are included in the ABS publication, [Labour Force, Australia](#) (cat. no. 6202.0); and
3. Participation rate data at the SA2 level from the Census of Population and Housing (the latest SALM data use the 2016 Census, but estimates prior to the March quarter 2014 use 2011 Census benchmarks).

The purpose of SPREE is to produce small area labour market estimates that reflect the regional disparities of the Centrelink data, while being consistent with the ABS Labour Force Survey estimates.

**Unemployment estimates** are produced by apportioning the level of unemployment at the SA4 level, as published by the ABS, across each of the SA2s within that region. This apportioning is based on the distribution of Centrelink Newstart/JobSeeker and Youth Allowance (other) beneficiaries at the SA2 level, benchmarked by ABS unemployment estimates by age, sex and marital status at the Greater Capital City Statistical Area (GCCSA) level.

**Labour force estimates** are produced by:

- taking the participation rate for each SA2 from the Census (in instances where an SA2 does not have a participation rate, the participation rate for the SA3 was used as a proxy);
- applying this to the latest available ABS estimated resident population (ERP) data for persons aged 15 and over for the SA2, to produce a labour force weighting for the SA2 within the SA4; and then
- allocating the total labour force for each ABS SA4 to the SA2s within that region according to the labour force weighting.

By using Census participation rates and the latest available ERP, the SA2 labour force estimates are able to adjust to changes in the distribution of population within an SA4 that have occurred since the last Census.

**Unemployment rate estimates** are produced by calculating the level of unemployment as a proportion of the labour force (consistent with ABS methodology).

As the reliability of estimates at the SA2 level are related to the size of the SA2, estimates are only published for SA2s that have a labour force of 100 or more as at the June quarter 2019. In addition, caution should still be exercised when interpreting movements in the estimates for SA2s or LGAs with a labour force of less than 1,000.

- While the underlying methodology used to produce the small area estimates in SALM is robust for the vast majority of areas, in a small number of cases it can result in figures

that do not accurately reflect labour market conditions within the region. As this is the case for the SA2 and LGA of Aurukun, these figures are not published.

Due to both the methodology used and the significantly higher variability of the data disaggregated below the SA2 or LGA level, it is not possible to derive reliable unemployment and unemployment rate estimates for particular groups (i.e.; males, females, youth) within an SA2 or LGA.

## Derivation of employment estimates

The data in Tables 1 and 2 in this publication are synthetic estimates based on ABS and Centrelink unemployment numbers and labour force data from the Labour Force Survey and the Census. As the production of SALM does not involve the use of any sources of, or attempt to estimate, the level of employment in an SA2, employment estimates should not be derived from these statistics. For more information, please email the SALM inbox at [SALM@skillscommission.gov.au](mailto:SALM@skillscommission.gov.au).

## Other sources of information

This publication, as well as data files in Excel format containing estimates back to the December quarter 2010, can be downloaded from the [SALM website](#).

## Unsmoothed series

The smoothed estimates presented in Tables 1 and 2 are the Department's official estimates of unemployment and the unemployment rate at the SA2 and LGA level. It is recognised, however, that some advanced users may need access to the unsmoothed estimates, which are used to produce the official figures. They are available on the [SALM website](#) under the explanatory notes section.

## 2011 ASGS SA2 and LGA estimates

Due to the quarterly population rebenchmarking of regional ABS *Labour Force Survey* data, the more recent 2011 ASGS estimates (up to the March quarter 2019) will continue to be revised for a number of quarters going forward. Estimates for those SA2s that have not had a break in series are included in the data files available online. However, if users need to obtain the latest available 2011 ASGS SA2 or LGA estimates for areas that have had a break in series, please email the SALM inbox at [SALM@skillscommission.gov.au](mailto:SALM@skillscommission.gov.au).
